provided in this session. The last para-  
graph provides a similar circumstance  
that apparently was experienced by the  
Subject. He was in a sensitive environment; he  
was mixing with the people for information and he at times  
using an assumed cover for action. This session provides support  
in verifying Subject's presence in the target area, covering his  
assigned targets and conducting his actions in the manner  
that he had described. More detail could have greatly  
increased the value of this session.
